

Our "Lunch and Learn" series is offered to companies who recognize the growing importance of Virtual and Augmented Reality and want to ensure their teams are equipped with the knowledge necessary to leverage this disruptive technology. The sessions are eye-opening to the overall potential of immersive technologies, resulting in thought-provoking audience discussions, questions and exciting new ideas for how VR and AR can be applied to your industry.

EDUCATE. INNOVATE. INSPIRE.

Educate your team on how these emerging technologies are already disrupting a broad range of industries. Discussing the today and tomorrow of Virtual Reality, Augmented Reality, Artificial Intelligence and Automation Applications, our team will provide a captivating presentation of real use cases of each technology, with examples for everyone to try.

After providing a foundation of "What are Virtual, Augmented and Mixed Realities", we discuss the most important industry trends and the technology developments that will eventually disrupt TV, Web, Social Media and Mobile. Real business cases from around the world show companies using VR to amplify their brands, engage with customers, improve employee skills and add value to their businesses. We tailor our presentations to each audience to ensure that your team leaves with the most relevant insights for your industry.

HANDS ON TECHNOLOGY DEMOS

It's impossible to fully grasp the experience of new realities until you've tried them for yourself. We will set up a pop-up immersive experience in your office, for your team to try advanced systems such as the HTC Vive, Microsoft HoloLens, Samsung GearVR and Google Daydream. We also bring a 360° Camera to grab an interactive photo of your team that can be viewed in VR, or shared on social media.

ABOUT METAVRSE

MetaVRse is a virtual + augmented reality innovation agency that creates applications and solutions for businesses. Using new immersive technologies, we develop cutting-edge experiences that drive brand awareness, sales, and consumer engagement. Our work includes:

- Technology-Powered Experiential and Event Marketing Activations
- Production of Custom 360° Marketing Videos
- Custom development of interactive VR and AR applications including hardware
- Thought Leadership Conference Presentations
- Strategic Consulting
- 360° Photo Booth™ Activations

Among our proud accomplishments last year was the development of the world's first 360° Photo Booth™. Launching at the premieres for Sony Entertainment's original TV series Timeless, and Disney's Moana, it was recently nominated for two Canadian Marketing awards.

We are happy to accommodate any special requests or demos that may fit your needs for a successful presentation.
