

VIRTUAL REALITY EVENT:

VR CAR RACING SIMULATOR

Feel the VRrooom!

Step into the driver's seat of one of the world's fastest cars on a variety of exotic race courses. Our VR CAR experience allows you to feel like you are really driving a race car with realistic steering wheel and pedals. With a SubPac built right into the chair, drivers will feel realistic vibrations as they rev their engine and navigate around treacherous turns. Just like a real NASCAR, the body of our VR CAR is fully brandable for your event allowing for unforgettable photo ops. Finally spectators can join the race by seeing the driver's view projected onto a big screen TV.

What you get:

4 Hours (or more) of unlimited Virtual Reality experiences using our fully immersive VR Racecar. A built in SubPac allows drivers to feel the rev of the engine!

Multiple systems are available for larger events and a variety of amazing experiences. Spectators get to see what the user is seeing on a bigscreen TV engaging them in the experience.

Our "Virtual Pit Crew" of VR experts make sure your guests have an unforgettable experience.
